

PRUMBSTM

Rescued Potato Peel Crumbs

Netherlands has one of the highest potato production worldwide

- 1.7 million tonnes of potatoes converted into 890,000 tonnes of finished potato products annually
- 4 million tonnes is the estimated total production of potatoes
- 436,000 tonnes of by-products and waste streams are generated from the processing of these potatoes
- Successful potato formulations can potentially save 132 metric tonnes of potato peel waste

**at working capacity of 11,000 kg per month (500 kg per working day)
